

IRB Reliance Exchange

YOUR SYSTEM SOLUTION FOR SINGLE IRB REVIEW

What is IREx?

IREx is a web-based system to help single IRBs (sIRBs) and lead study teams manage the sIRB review process for the life of the study (not just site onboarding). Acting as a central hub for studies undergoing sIRB review, IREx centralizes and automates sIRB-related documentation, communication, and coordination.

IREx is free to use and doesn't require software downloads, making it easier for institutions, HRPPs, investigators, and study teams to collaborate on sIRB-related tasks.

How does IREx benefit the sIRB?

Fewer emails and questions from study teams

A central location to track all multisite studies where your institution is the sIRB

More time and resources to dedicate to IRB activities

Ability to analyze sIRB processes via automatically captured metrics

Scan to Request a Demo / Learn More

What does the sIRB do in IREx?

Create the study shell

Select what features to use (what reliance agreements are offered; is indemnification required; customize or use templated IREx instructions, etc.)

Add the lead study team contacts (PI, Coordinator)

Confirm the flexible elements of reliance (Party responsible for HIPAA Determination, COI Review, etc.)

IREx: Streamline sIRB Review and Coordination, Simplify Multisite Trial Start-Up

IRB Reliance Exchange

YOUR SYSTEM SOLUTION FOR SINGLE IRB REVIEW

Take the Guesswork out of Single IRB Review

- **Standardize the sIRB process** - employ a common system used by 50+ institutions serving as the single IRB of a study
- **Harmonize local review documentation** - use electronic forms developed by the Trial Innovation Network sIRBs
- **Empower study teams to track site readiness for sIRB review** - save sIRB time and resources
- **Automate sIRB metrics collection** - evaluate the goals of the sIRB mandate

IREx History

Since 2011, the IREx team has received NIH funding to build and maintain an sIRB platform. We've gone by a couple different names (IRBshare, IRBchoice), but have always had the same goals: **to increase efficiency of sIRB review and to support everyone involved**. With many lessons learned over the last 10+ years, our team and our platform are proud to continue collaborating with our users to optimize IREx to simplify the sIRB experience.

What does the Lead Study Team do in IREx?

- **Manage** site access to study
- **Disseminate** reliance instructions
- **Track** site readiness for sIRB review
- **Download** sites' documentation and submit to sIRB
- **Upload** and disseminate sites' approvals

User Informed Interface

IREx meets with our User Feedback Group (UFG) monthly. This group is comprised of HRPP staff and Lead Study Team Coordinators from **>20 institutions** who inform feature development and tell us how to make the platform work better for them.
